Every office needs:

Isolyser®/SMS® 4000

Isolyser/SMS or SMSm is approved for sharps disposal in all 50 States. SMS is for regular trash disposal; SMSm is for mail-back (same price).

AMALGON® 1

If you REMOVE amalgam, ensure compliance by recycling all of your amalgam-contaminated items. Over 50% of TCLP tests show that amalgam-contaminated items are hazardous.* It is illegal for hazardous amalgam-contaminated items (shown below) to be rinsed in the sink or thrown in the trash.

No sorting of contact & non-contact items required

Many offices also need:

Isolyser®/SMS®m 5G

Mail-back disposal of red bags and full sharps containers.

CHEMGON® 2.5

Converts traditional x-ray waste to a non-hazardous solid waste.

FOILGON®

Lead foil recycling.

ALDEX® AMS1010

Renders aldehydes non-hazardous.

Regular Trash
Smallest Carbon Footprint

US Postal Service
Smaller Carbon Footprint

UPS
Smaller Carbon Footprint

Drain Disposal
Smallest Carbon Footprint

Label color designates disposal/transportation method

Order Today From Angel Dental Supply

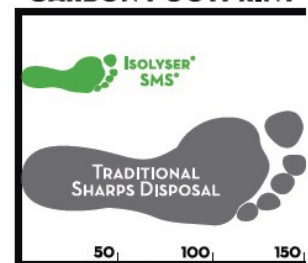

The WasteWise® Way is all about efficiency. WasteWise® products are disposed of by trucks (trash, UPS, USPS) already visiting your office, eliminating a fleet of trucks used exclusively for sharps disposal.

The WasteWise® Way also eliminates the need for off-site treatment, like incineration. This, combined with less transportation, means you *spend a lot LESS*, generate a much *smaller carbon footprint* and *reduce your liability* because untreated waste never leaves your office.

Thank you for helping us eliminate millions of pounds of greenhouse gas and turning kids' wishes into reality by granting us the ability to support the Make-A-Wish Foundation®.

Gregg R. Short, Founder/CEO, service@wastewise.com

CARBON FOOTPRINT

100 fewer miles = lower costs & a smaller carbon footprint
